

Tech WORKS

Auto/Diesel Mechanics

Steps to complete Tech WORKS in Auto/Diesel Mechanics:

At least seven total classes in Career Technology Education Department with a "C" or above

Required courses:

- Electricity/Electronics
- Small Engines
- Auto Care & Maintenance

Area of emphasis classes in the Auto/Diesel Mechanics Pathway (select at least three):

- Auto Chassis and Drive Trains
- Auto Diagnostics
- Metals
- Manufacturing
- Diesel Technician I**
- Diesel Technician II**

College level courses to consider:

- Applied Math I

Attend three career fairs

Attend one company tour and one job shadow

Go on at least one community college/college/university/apprenticeship program tour

Students must have a good attendance record, be in class on time and demonstrate cell phone etiquette during classes

All students will successfully fulfill all DCSD requirements for graduation

** Concurrent classes - These classes enable high school students who have met the eligibility requirements of the College and high school to take college coursework. Concurrent courses start your college GPA.
